✓ DIAMOND FENCING

Is substantially stronger than similar fence options and is recommended for use at corporate or manufacturing facilities for security.

FEATURES: - 13/16" x 1-5/8" roll formed line rails

MESH OPTION SIZES: 1/2" • 3/4" • 1-1/2" • 2"

✓ INFRASTRUCTURE FENCING

Meets or exceeds ASTM 2548-06 specifications and can accommodate a full range of additional security add-ons. It is the barrier solution for any site security plan.

FEATURES: - 1-5/8" x 1-5/8" roll formed line rails
- Optional 45-degree anti-climb panel or barbed wire

MESH OPTION SIZES: 1/2" • 3/4" • 1" • 1-1/2"

✓ RETROFIT FENCING

Can be retrofitted to steel picket (palisade) or chain link for increased security. Significantly increases physical security and deters access.

FEATURES: - The ability to utilize fence framework already set in place
- Can be easily added over existing framework
- Can be used when completely replacing chain link fabric

MESH OPTION SIZES: 1/2" • 3/4"

✓ METAL SAFETY RAILING

An industrial safety product that provides a barrier around manufacturing machinery and helps meet applicable OSHA machine guarding standards. The panels feature a closed edge frame and can be cut to any angle. Also used in shopping centers, convention centers, etc.

FEATURES: - Optional U-edging

MESH OPTION SIZES: 1/2" • 3/4" • 1" • 1-1/2" • 2"

✓ METAL SECURITY GATES

Available in both cantilever and swing and feature a "picture frame" composition. Built to add the expanded metal mesh on site by fitting it inside the frame. All pedestrian security gates arrive pre-fabricated and ready to hang. There are two gate choices, a standard or a pre-hung with panic bar and ship with all standard hardware including hinges and latches. Specialty access control options including automatic gate operators and panic bars are available.
